

Business Requirements Document (BRD)

Project Title

Education ERP System

Version

1.1

Prepared By

AOA Systems Analysis Team.

Date

June 2026

1. Executive Summary

The Education ERP System is a centralized enterprise platform designed to automate and integrate the academic, administrative, financial, HR, communication, and operational processes of educational institutions.

The system shall provide a single source of truth for students, parents, teachers, staff, administrators, finance teams, and management. It shall support the full student lifecycle from application submission and document collection through admission, class enrollment, academic tracking, examination, invoicing, payment, graduation, and alumni transition.

The platform shall also manage institutional back-office operations such as accounting, VAT-compliant invoicing, procurement, inventory, payroll, employee attendance, transportation, library, accommodation, document archiving, executive reporting, and role-based access control.

2. Business Problem

Current challenges include:

- Manual or fragmented student admission processes.
 - Disconnected student, parent, academic, finance, HR, and inventory records.
 - Inefficient attendance tracking for students and employees.
 - Delayed fee collection, installment follow-up, and financial reconciliation.
 - Limited support for VAT-compliant invoicing and audit-ready accounting.
 - Manual examination scheduling, grading, and report generation.
 - Weak visibility into student performance, teacher productivity, and institutional KPIs.
 - Inefficient communication among administrators, parents, students, and teachers.
 - Lack of integrated document management for applications, student files, employee files, invoices, and official letters.
 - Difficulty scaling operations across campuses, stages, grades, sections, departments, and currencies.
-

3. Business Objectives

Strategic Objectives

1. Digitize the full educational institution operating model.
2. Improve student, parent, teacher, and employee experience.
3. Automate admissions, enrollment, academic, attendance, examination, and graduation workflows.
4. Improve fee collection, receivables tracking, accounting accuracy, and financial compliance.
5. Provide real-time dashboards and reports for academic, financial, HR, inventory, and operational decisions.
6. Support secure multi-campus, multi-language, multi-currency, and role-based operations.
7. Reduce administrative overhead through workflows, notifications, approvals, and self-service portals.
8. Improve institutional continuity through backups, audit trails, data security, and crisis communication capabilities.

Success Metrics

- 90% reduction in manual paperwork.
 - 80% faster admission processing.
 - 95% student attendance recording accuracy.
 - 95% employee attendance and leave transaction accuracy.
 - 99.9% system availability.
 - 100% visibility of fee balances, installments, invoices, receipts, and outstanding amounts.
 - 100% traceability for financial transactions from invoice or voucher to ledger entry.
 - 85% adoption by teachers within the first academic term.
 - Real-time management dashboards available to authorized leadership users.
-

4. Stakeholders

Stakeholder	Role	Primary Interest
Board Members	Strategic oversight	Institutional performance, risk, compliance, and profitability
Institution Management	Decision makers	Operational visibility and cross-campus performance
Registrar Office	Student administration	Admissions, enrollment, student records, transfers, graduation
Admissions Team	Enrollment processing	Applications, documents, interviews, approvals, admission letters
Academic Affairs	Academic operations	Programs, curriculum, stages, grades, sections, schedules, exams
Faculty Members	Teaching and grading	Classes, attendance, content, assignments, grades, communication
Students	End users	Schedules, attendance, assignments, grades, fees, services
Parents / Guardians	Student monitoring	Academic progress, attendance alerts, invoices, payments, messages
Finance Department	Fees and accounting	Invoicing, collections, VAT, journals, ledgers, reports

Stakeholder	Role	Primary Interest
HR Department	Staff management	Employees, contracts, attendance, leave, payroll, performance
Procurement Team	Purchasing	Suppliers, purchase requests, quotations, purchase orders, invoices
Inventory Team	Stock control	Items, warehouses, transfers, stocktaking, supplies
Transport Team	Transportation	Routes, vehicles, drivers, student assignments, fees
Library Team	Library services	Catalog, borrowing, returns, penalties, library inventory
Hostel / Accommodation Team	Accommodation	Rooms, occupancy, allocation, accommodation fees
IT Department	System administration	Users, security, integrations, backups, availability
Government Regulators	Compliance	Education, tax, privacy, audit, and reporting obligations

5. Project Scope

In Scope

Student Lifecycle Management

- Online applications.
- Admission workflows and approvals.
- Application document management.
- Student and guardian profiles.
- Enrollment, re-enrollment, transfers, withdrawals, graduation, and alumni transition.
- Student account statements and outstanding balance views.

Academic Management

- Educational stages, grades, sections, programs, courses, subjects, and curriculum mapping.
- Academic years, terms, semesters, and calendars.
- Class enrollment and section assignment.
- Timetables for classes, teachers, rooms, and exams.
- Student attendance, absence, leave, and parent alerts.
- Examination, grading, transcripts, progress reports, GPA/CGPA where applicable.

Learning Management

- Course materials.
- Assignments.
- Assessments.
- Online classes.
- Discussion forums.
- Learning analytics.
- Integration with external e-learning platforms.

Finance, Accounting, and Collections

- Chart of accounts.
- Journal entries.
- Cost centers.
- Payment vouchers and receipt vouchers.
- Banks and safes/cashboxes.
- Student fee structures.
- Installment plans and due dates.
- VAT-compliant invoices and credit notes.
- Multiple payment methods including cash, bank transfer, card, Mada, and online payment gateways.
- Parent and student payment history.
- Revenue, expenses, profit and loss, trial balance, account statements, and collection reports.

Human Resources and Payroll

- Organizational structure.
- Employee and teacher profiles.
- Employee contracts.
- Attendance and departure tracking.
- Leave management.

- Payroll, salaries, wages, deductions, allowances, and end-of-service support.
- Staff tasks, workload, productivity, and performance evaluations.
- Employee self-service capabilities.

Procurement, Inventory, and Assets

- Supplier profiles and categories.
- Purchase requests.
- Quotation comparison.
- Purchase orders and purchase invoices.
- Item data, units of measurement, attributes, batches, and expiry dates where needed.
- Warehouses, stock movements, stocktaking, and transfers.
- School supplies issue and return.
- Fixed asset registration, location, movement, depreciation, and maintenance.

Operations and Services

- Library management.
- Transport management.
- Hostel/accommodation management.
- Student services and service fees.
- Document management and archiving for official records, applications, contracts, invoices, and letters.
- Maintenance/service request tracking for facilities or equipment where applicable.

Communication and Portals

- Parent portal.
- Student portal.
- Teacher/faculty portal.
- Employee self-service portal.
- Administrative web portal.
- Mobile application support.
- Email, SMS, push notifications, announcements, and instant alerts.
- Targeted messaging by campus, grade, section, course, role, or individual recipient.

Reporting and Analytics

- Academic reports.

- Student and parent reports.
- Financial and accounting reports.
- HR and payroll reports.
- Inventory, suppliers, and purchasing reports.
- Transport, hostel, library, and operational reports.
- Executive dashboards.
- Custom report builder.
- PDF and Excel exports.

Administration, Security, and Compliance

- Role-based access control.
- User account management.
- Approval workflows.
- Audit logging.
- Data encryption.
- Multi-factor authentication.
- Privacy controls.
- Multi-campus setup.
- Multi-language and multi-currency support.
- Configurable policies, numbering series, forms, templates, and notifications.

Out of Scope

- Third-party curriculum content creation.
 - Custom hardware manufacturing.
 - External accreditation authority systems, except for integrations or export files explicitly agreed in project scope.
 - Full replacement of external banking, tax authority, or government platforms.
 - Non-education industry modules that do not support school or institute operations.
-

6. Business Requirements

BR-001 Student Admission Management

The system shall:

- Support public and internal online application submission.
- Capture applicant personal, contact, prior education, requested campus, requested grade/stage, sibling, guardian, transport, and accommodation information.
- Allow applicants or staff to upload required documents, images, certificates, IDs, and notes.
- Validate mandatory fields and document requirements by campus, stage, grade, or program.
- Manage configurable admission workflows including review, interview, assessment, approval, rejection, waitlist, and offer.
- Track application status and activity history.
- Generate admission letters, offer letters, rejection letters, and application summaries.
- Convert approved applicants into active students without duplicate data entry.
- Create linked student, guardian, user, fee, and enrollment records during admission confirmation.

BR-002 Student and Parent Information Management

The system shall:

- Maintain complete student profiles including demographics, contact details, health notes, academic status, documents, photos, and identification records.
- Maintain parent and guardian profiles with relationship, contact, authorization, billing, and emergency contact information.
- Support one parent or guardian linked to multiple students and one student linked to multiple guardians.
- Store student academic history, enrollment history, attendance history, discipline notes, documents, invoices, payments, and communications.
- Generate student account statements and outstanding balance summaries.
- Support student transfer, withdrawal, graduation, suspension, and reactivation.
- Maintain privacy rules controlling which staff can view sensitive student, health, financial, or family information.

BR-003 Academic Structure and Curriculum Management

The system shall:

- Manage campuses, academic years, terms, semesters, stages, grades, programs, departments, sections, courses, subjects, rooms, and teaching periods.
- Define curriculum plans and course/subject requirements by stage, grade, program, or term.
- Assign teachers to courses, sections, and subjects.

- Support class enrollment, section capacity, room capacity, prerequisites, and timetable conflict checks.
- Manage academic calendars including holidays, examination periods, registration windows, and fee due dates.
- Support promotion rules and progression between stages, grades, or academic years.

BR-004 Timetable and Scheduling Management

The system shall:

- Create class timetables by campus, grade, section, room, teacher, subject, and period.
- Detect conflicts for teachers, rooms, sections, and students.
- Publish schedules to student, parent, and teacher portals.
- Manage exam timetables and room allocation.
- Support schedule changes with notification to affected users.
- Provide printable and exportable timetable views.

BR-005 Student Attendance Management

The system shall:

- Record attendance by class, subject, section, day, period, or session.
- Support mobile attendance entry by authorized teachers.
- Support biometric or device integration where available.
- Track presence, absence, lateness, excused absence, medical leave, and other institution-defined statuses.
- Send automated absence, lateness, or threshold alerts to parents and administrators.
- Calculate attendance percentages and eligibility indicators.
- Generate attendance reports by student, class, subject, teacher, date range, campus, or grade.

BR-006 Examination, Assessment, and Grade Management

The system shall:

- Define exams, assessments, assignments, grading schemes, rubrics, weighting, and passing rules.
- Schedule examination timetables and assign rooms or invigilators.
- Capture marks, grades, comments, results, retakes, and moderation approvals.
- Calculate totals, averages, ranks, GPA, CGPA, or institution-defined performance indicators.

- Generate report cards, transcripts, certificates, and progress reports.
- Publish approved results to student and parent portals.
- Restrict grade changes through permissions, approval workflows, and audit logs.

BR-007 Learning Management

The system shall:

- Allow teachers to upload learning materials, resources, links, and lesson content.
- Manage assignments, submissions, due dates, grading, and feedback.
- Support online assessments and quizzes.
- Support discussion forums or class collaboration spaces.
- Integrate with external e-learning or virtual classroom platforms.
- Track student participation, submission status, and learning progress.

BR-008 Fee, Billing, and Collection Management

The system shall:

- Define fee categories, fee structures, discounts, scholarships, penalties, and optional services.
- Assign fees by campus, grade, program, student group, service, or individual student.
- Create installment plans with due dates and payment schedules.
- Generate VAT-compliant invoices, receipts, credit notes, and account statements.
- Support cash, bank transfer, card, Mada, online payments, and payment gateway integrations.
- Allocate payments to invoices, installments, services, or student balances.
- Send automated reminders for upcoming, due, and overdue payments.
- Track outstanding balances by student, parent, class, grade, campus, and period.
- Support finance approval for waivers, refunds, discounts, and write-offs.

BR-009 Accounting and Financial Management

The system shall:

- Maintain a configurable chart of accounts.
- Generate automated journal entries from invoices, receipts, payments, purchase invoices, payroll, inventory, and asset transactions.
- Manage manual journal entries with approval and audit trails.
- Manage receipt vouchers, payment vouchers, bank accounts, safes/cashboxes, and reconciliations.

- Support cost centers by campus, department, program, grade, project, or activity.
- Track revenues, expenses, receivables, payables, taxes, and financial periods.
- Produce trial balance, general ledger, account statement, balance sheet, profit and loss, cash flow, cost center, VAT/tax, and audit reports.
- Support financial closing and period lock controls.

BR-010 Parent Portal

The system shall allow parents to:

- View linked student profiles, attendance, grades, reports, schedules, assignments, and behavior notes.
- View invoices, installments, receipts, payment history, and outstanding balances.
- Pay fees online where payment integration is enabled.
- Receive notifications for absences, grades, announcements, fee due dates, transport updates, and emergencies.
- Communicate with authorized faculty or administration.
- Download approved documents such as report cards, invoices, receipts, and letters.

BR-011 Student Portal

The system shall allow students to:

- View schedules, enrolled courses, attendance, grades, assignments, and learning resources.
- Submit assignments and participate in course discussions.
- View approved invoices or payment status where institution policy allows.
- Request services such as documents, transport, library services, or accommodation where enabled.
- Receive announcements, alerts, and academic notifications.

BR-012 Faculty and Teacher Management

The system shall:

- Maintain teacher profiles, qualifications, contact details, documents, employment details, and assigned roles.
- Assign teachers to courses, sections, timetables, exams, and student groups.
- Track teaching workload, attendance responsibilities, grading responsibilities, and task completion.

- Support teacher performance evaluations and productivity reports.
- Allow teachers to manage attendance, grades, materials, assignments, and student communications within their permissions.

BR-013 Human Resources and Payroll

The system shall:

- Manage organizational structures, departments, positions, employees, and contracts.
- Store employee personal, administrative, financial, document, and employment data.
- Manage employee attendance, departure, overtime, shifts, leave requests, approvals, and leave balances.
- Process payroll including basic salary, allowances, deductions, advances, penalties, benefits, taxes where applicable, and end-of-service calculations.
- Generate payslips, payroll journals, salary transfer files, and payroll reports.
- Support recruitment, onboarding, task assignment, performance reviews, and employee self-service.

BR-014 Procurement Management

The system shall:

- Manage supplier categories, supplier profiles, contacts, payment terms, and documents.
- Create purchase requests from departments, inventory needs, maintenance needs, or manual entry.
- Support quotation collection and quotation comparison.
- Generate purchase orders and track approval status.
- Record purchase invoices, goods receipts, returns, and supplier payments.
- Track supplier debts, aging, and purchasing reports.
- Integrate procurement transactions with inventory and accounting.

BR-015 Inventory and Supplies Management

The system shall:

- Maintain item master data including categories, attributes, units of measurement, batch numbers, expiry dates, and reorder levels.
- Manage warehouses, stock locations, stock opening balances, stock receipts, issues, adjustments, and transfers.

- Track school supplies, books, uniforms, lab materials, stationery, and other institution-defined inventory.
- Support inventory transfers between warehouses or campuses.
- Support stocktaking and variance approval.
- Generate inventory valuation, movement, supplier, purchase, low-stock, expiry, and stocktaking reports.

BR-016 Asset Management

The system shall:

- Register fixed assets by category, location, owner department, cost, acquisition date, warranty, and status.
- Track asset movement, assignment, transfer, maintenance, disposal, and depreciation.
- Generate asset register, depreciation, maintenance, movement, and location reports.
- Integrate asset acquisition and depreciation with accounting where applicable.

BR-017 Library Management

The system shall:

- Manage books, categories, authors, publishers, copies, barcodes, shelves, and availability.
- Manage library memberships for students and employees.
- Issue, renew, reserve, and return books.
- Calculate overdue penalties and lost/damaged item charges.
- Integrate library charges with student billing where applicable.
- Generate catalog, issue, return, overdue, penalty, and inventory reports.

BR-018 Transport Management

The system shall:

- Manage routes, stops, vehicles, drivers, assistants, schedules, and capacity.
- Assign students to routes and stops.
- Track transport fees and integrate them with student billing.
- Manage vehicle documents, maintenance schedules, inspections, and incidents.
- Send transport-related alerts to parents and staff.
- Generate route, vehicle, student assignment, fee, and maintenance reports.

BR-019 Hostel and Accommodation Management

The system shall:

- Manage buildings, floors, rooms, beds, room types, capacity, and occupancy.
- Process accommodation requests and room allocations.
- Track check-in, check-out, room transfers, and occupancy status.
- Manage accommodation fees and integrate them with student billing.
- Generate occupancy, allocation, fee, and room availability reports.

BR-020 Communication and Notification Management

The system shall:

- Send email, SMS, push, in-app, and instant notifications.
- Broadcast announcements to selected campuses, grades, sections, courses, roles, or individuals.
- Provide templates for admission, attendance, grades, invoices, due payments, overdue payments, emergencies, events, and general announcements.
- Track notification delivery status where supported by the channel provider.
- Support multilingual message templates.
- Maintain communication history linked to students, parents, employees, and system events.

BR-021 Document Management and Archiving

The system shall:

- Store and classify student documents, application documents, employee documents, invoices, receipts, contracts, official letters, approvals, and archived records.
- Support file metadata, document type, expiry date, owner, related entity, version, and status.
- Enforce access permissions for sensitive documents.
- Support search, download, preview, and audit trail capabilities.
- Trigger alerts for expiring documents where applicable.

BR-022 Reporting and Analytics

The system shall:

- Generate standard operational, academic, financial, HR, payroll, inventory, procurement, transport, library, hostel, and executive reports.
- Provide dashboards for enrollment, attendance, student performance, teacher productivity, fee collection, outstanding balances, revenue, expenses, payroll, inventory, and institutional KPIs.
- Allow authorized users to filter reports by campus, academic year, term, stage, grade, section, department, date range, and status.
- Export reports to PDF and Excel.
- Support custom report creation for authorized users.
- Provide scheduled report delivery where configured.

BR-023 Administration, Configuration, and Workflow

The system shall:

- Manage organizations, campuses, branches, departments, academic structures, financial structures, numbering series, templates, forms, and policies.
- Configure approval workflows for admissions, fee discounts, refunds, grade changes, purchase requests, purchase orders, leave, payroll, and document approvals.
- Maintain user roles, permissions, menus, field-level access where required, and delegated authority.
- Support configuration without source code changes for common school policies and master data.
- Maintain audit logs for create, update, delete, approve, reject, login, payment, and report-export activities.

BR-024 Security, Privacy, and Compliance

The system shall:

- Enforce role-based access control for all modules.
- Support multi-factor authentication for privileged users and optional MFA for other users.
- Encrypt sensitive data in transit and at rest.
- Maintain audit logs for sensitive data access and administrative changes.
- Protect student, parent, employee, financial, and health data according to applicable privacy regulations.
- Support VAT/tax-compliant invoices and financial reporting where required.
- Support data retention, backup, restore, and disaster recovery policies.
- Provide emergency communication and continuity support for crisis events.

BR-025 Multi-Campus, Localization, and Scalability

The system shall:

- Support multiple campuses, branches, departments, academic years, terms, grades, and sections.
 - Support centralized and campus-specific administration.
 - Support multiple languages including English and Arabic.
 - Support multiple currencies where required.
 - Allow institution-specific branding, templates, forms, report headers, and notification content.
 - Scale from small schools to large institutes with high user volume and large data sets.
-

7. User Roles

Student

- View courses, schedules, assignments, attendance, grades, and reports.
- Submit assignments and online assessments.
- Access learning materials and discussions.
- Request configured services.
- Receive announcements and alerts.

Parent / Guardian

- Monitor student attendance, performance, schedules, and reports.
- View invoices, installments, receipts, and balances.
- Pay fees online where enabled.
- Receive absence, fee, academic, transport, and emergency notifications.
- Communicate with teachers and administration.

Faculty / Teacher

- Manage classes, attendance, learning content, assignments, assessments, and grades.
- View assigned timetable and workload.
- Communicate with students, parents, and administration.
- Access class and student performance reports.

Registrar / Admissions Officer

- Manage applications, applicant documents, interviews, assessments, admission decisions, and enrollment.
- Manage student records, guardians, transfers, withdrawals, and graduation.
- Generate admission and student reports.

Academic Administrator

- Manage curriculum, academic years, terms, stages, grades, sections, courses, schedules, exams, and promotion rules.
- Monitor attendance, grades, and academic performance.

Finance Officer / Accountant

- Manage fee structures, invoices, receipts, installments, discounts, refunds, and collections.
- Manage journals, vouchers, ledgers, accounts, banks, safes, cost centers, VAT, and financial reports.

HR Officer

- Manage employees, contracts, attendance, leave, payroll, recruitment, and performance.
- Generate HR and payroll reports.

Procurement Officer

- Manage suppliers, purchase requests, quotations, purchase orders, purchase invoices, and supplier reports.

Inventory Manager

- Manage items, warehouses, stock movements, transfers, stocktaking, and inventory reports.

Transport Manager

- Manage routes, vehicles, drivers, student assignments, fees, maintenance, and transport alerts.

Library Manager

- Manage catalog, copies, memberships, issues, returns, penalties, and library reports.

Hostel Manager

- Manage buildings, rooms, beds, allocations, occupancy, fees, and accommodation reports.

Executive / Management

- View dashboards, KPIs, cross-campus performance, financial summaries, and strategic reports.

System Administrator

- Configure system settings, users, permissions, workflows, integrations, backups, and security controls.
-

8. Non-Functional Requirements

Performance

- Standard page and API response time shall be under 3 seconds for common operations under normal load.
- Report generation shall complete within agreed thresholds based on report complexity and data volume.
- The system shall support at least 20,000 concurrent users, subject to deployment sizing.

Availability

- The system shall provide 99.9% uptime excluding approved maintenance windows.
- Planned maintenance shall be communicated to authorized users in advance.

Security

- The system shall enforce role-based access control across all modules.
- The system shall support multi-factor authentication.

- The system shall encrypt data in transit using secure protocols.
- Sensitive data at rest shall be encrypted or protected using approved database and storage controls.
- The system shall maintain audit logs for sensitive and administrative actions.

Scalability

- The system shall support multi-campus growth.
- The system shall support cloud deployment and horizontal scaling where the architecture allows.
- The system shall support configurable academic and financial structures without code changes.

Reliability

- The system shall support automated backups.
- The system shall support disaster recovery procedures.
- The system shall protect transactions from partial completion through reliable commit/rollback behavior.

Usability

- The system shall provide web and mobile-friendly interfaces for key user groups.
- The system shall support English and Arabic user interfaces.
- The system shall provide accessible navigation and clear validation messages.

Compliance

- The system shall support student data privacy requirements.
- The system shall support financial auditing requirements.
- The system shall support VAT/tax invoice requirements where applicable.

9. Integration Requirements

The system shall integrate with:

- Payment gateways for online fee payments.

- Bank transfer or reconciliation services where available.
 - Government education systems where required.
 - Tax, VAT, or e-invoicing platforms where required.
 - Email services.
 - SMS gateways.
 - Push notification services.
 - Learning platforms and virtual classroom systems.
 - Biometric or device-based attendance systems.
 - Accounting or external financial systems where needed.
 - Identity management and single sign-on systems.
 - Document storage services.
 - Reporting or business intelligence platforms where required.
-

10. Reporting Requirements

Academic Reports

- Admission pipeline report.
- Student profile report.
- Enrollment report.
- Attendance report.
- Absence and lateness report.
- Grade report.
- GPA/CGPA report.
- Transcript.
- Report card.
- Student performance dashboard.
- Teacher productivity report.

Finance and Accounting Reports

- Fee collection report.
- Outstanding fees report.
- Installment aging report.
- Student and parent account statement.
- Invoice and receipt report.

- Revenue report.
- Expense report.
- Trial balance.
- General ledger.
- Account statement.
- Cost center report.
- Profit and loss statement.
- Balance sheet.
- VAT/tax report.

HR and Payroll Reports

- Employee profile report.
- Employee attendance report.
- Leave report.
- Payroll report.
- Payslip report.
- Staff workload report.
- Performance evaluation report.

Procurement, Inventory, and Asset Reports

- Supplier report.
- Purchase request report.
- Quotation comparison report.
- Purchase order report.
- Purchase invoice report.
- Stock movement report.
- Stock balance report.
- Stocktaking report.
- Low-stock report.
- Asset register.
- Depreciation report.

Operational Reports

- Transport route report.
- Vehicle maintenance report.

- Student transport assignment report.
- Library catalog report.
- Book issue and overdue report.
- Hostel occupancy report.
- Student accommodation report.
- Document expiry report.
- Notification delivery report.

Executive Reports

- Enrollment trends.
 - Fee collection dashboard.
 - Outstanding receivables dashboard.
 - Student performance dashboard.
 - Attendance dashboard.
 - Financial performance dashboard.
 - HR dashboard.
 - Inventory dashboard.
 - Institutional KPI dashboard.
-

11. Assumptions

- Internet connectivity is available for users who access cloud or web features.
 - Users have approved devices and browsers.
 - Existing student, parent, employee, finance, and inventory data can be migrated from available sources.
 - Payment gateway, SMS, email, government, and third-party integrations provide usable APIs or import/export mechanisms.
 - Institution policies for fees, grading, promotion, discounts, approvals, and data access will be provided during analysis.
 - Regulatory requirements for the target country or region will be confirmed before implementation.
-

12. Constraints

- Budget limitations may affect implementation phases and integration depth.
 - Regulatory requirements may impose invoice, privacy, retention, reporting, or hosting constraints.
 - Academic calendar deadlines may limit rollout windows.
 - Legacy data quality may affect migration timelines and cleansing effort.
 - Third-party gateway or government system availability may affect integration delivery.
 - Mobile application store review timelines may affect mobile release dates.
-

13. Acceptance Criteria

The project shall be considered successful when:

- All agreed core modules are operational in production.
 - Admission, student, academic, attendance, examination, fee, accounting, HR, inventory, communication, reporting, and administration workflows pass UAT.
 - Data migration is completed and reconciled.
 - Role-based permissions are configured and validated.
 - Fee invoices, receipts, vouchers, journal entries, and financial reports reconcile with approved test scenarios.
 - Parent, student, teacher, finance, HR, and administrator portals meet approved requirements.
 - Required integrations are tested successfully.
 - Reports meet business requirements and export correctly.
 - Backup and restore procedures are validated.
 - Users are trained.
 - Stakeholders approve production deployment.
-

14. High-Level Modules

1. Admissions Management
2. Student Information System (SIS)
3. Parent and Guardian Management
4. Academic Structure and Curriculum Management
5. Timetable and Scheduling Management
6. Attendance Management
7. Examination and Grade Management

8. Learning Management System (LMS)
9. Fee, Billing, and Collection Management
10. Accounting and Financial Management
11. HR, Payroll, and Employee Self-Service
12. Procurement Management
13. Inventory and Supplies Management
14. Asset Management
15. Library Management
16. Transport Management
17. Hostel and Accommodation Management
18. Communication and Notification Management
19. Document Management and Archiving
20. Student Portal
21. Parent Portal
22. Faculty Portal
23. Administrative Portal
24. Mobile Applications
25. Reporting and Analytics
26. Administration, Security, and Workflow
27. Integration Framework
28. Multi-Campus, Localization, and Scalability
